

Custom Laser Engraving

CUSTOM ENGRAVED CCTV Lenses

Times are tough and the economy doesn't seem to be getting better. However, there are still steps to take that will greatly improve your bottom line.

Repeat lens business can be dramatically enhanced with custom engraved CCTV lenses supplied by Midwest Optical Systems. Instead of offering the same lenses that can be purchased from any of a host of suppliers, provide them with the IDENTICAL or similar lenses engraved with your company name, part number, logo, or any other information including serial numbers or bar codes.

Directly imported from the manufacturers by MidOpt, these lenses are often the very same precision CCTV lens designs that you are already familiar with... without the sticker or silk-screened logo and part number that your competition is also selling.

Programmable, servo-controlled, rotary laser engraving is provided on the circumference of otherwise unmarked lens and filter mounts, typically on the same day the order is placed, at NO ADDITIONAL COST when 10 or more lenses are ordered. More than 120 lens designs are available. Please contact MidOpt for further details.
